

QorlQ T1024/14 and T1023/13 Communications Processors

Next-generation system-on-chip (SoC) for low-cost enterprise and service provider edge and network control applications

TARGET APPLICATIONS

- ▶ Wired and wireless branch routers
- ▶ WLAN 11ac enterprise access points
- ▶ Service provider WLAN access points
- Unified threat management gateways
- Multifunction printers
- ▶ Router and switch controllers
- ▶ Line card controllers
- Industrial automation and computing, single board computers
- Aerospace and defense ruggedized network equipment

The QorlQ T1024/23 communications processors combine single or dual 64-bit cores, built on Power Architecture® technology, with high-performance Data Path Acceleration Architecture (DPAA) and network peripheral bus interfaces required for networking and telecommunications applications. The T1024 and T1014 processors come in a full featured 23 x 23 mm package which provides scalable pin compatibility with the quad-core T1042 processor, and even the eight-core T2081 processor, for price and power scaling with a single system design. The T1023 and T1013 processors are interfaces and power-optimized SoCs designed to deliver impressive

single- or dual-core performance for cost and power sensitive networking systems. Both versions offer an excellent software compatible 64-bit and I/O upgrade path for the popular QorlQ P10XX family of 32-bit communications processors.

SOFTWARE AND TOOL SUPPORT

With the help of our partner network, we deliver a wide range of tools, run-time software, reference solutions and services to accelerate your designs.

- CodeWarrior Development Studio for Power Architecture technology
- ▶ Proprietary QorlQ Linux® SDK
- ▶ VortiQa application software
 - VortiQa application identification software (AIS)
 - Enterprise software for networking
 - VortiQa open network switch software
 - VortiQa open network director software

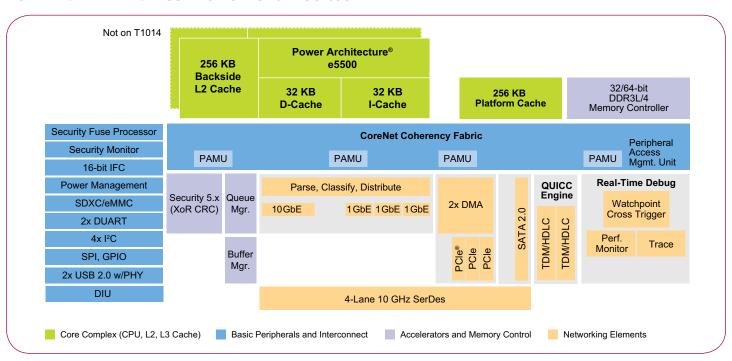

- ▶ Professional services and support
 - Commercial services
 - Linux SDK support package
 - Reference design software (RDS) support package
- ▶ Third-party software and tools
 - Enea, Green Hills, Mentor Graphics and Wind River

QORIQ T1014 AND T1024 COMMUNICATIONS PROCESSOR

QorIQ T1023/24 PROCESSORS FEATURES LIST

 Up to 1.4 GHz with 64-bit ISA support Low latency, per core, core clocked 256 KB dedicated cache Hybrid 32-bit mode to support legacy software and transition to a 64-bit architecture 	
Nap, wait and doze low-power modes	
CoreNet platform cache • 256 KB shared platform cache for stashing support	
CoreNet fabric supporting coherent and non-coherent transactions with prioritization a bandwidth allocation amongst CoreNet endpoints QMAN fabric supporting packet-level queue management and quality of service	nd
64-bit DDR3L/4 SDRAM memory ontroller with ECC support • 32-bit or 64-bit low power DDR up to 1600 MT/s	
Full L2/3 tunneling and en/decrypt offload support for functions such as WLAN CAPWAP/DTLS secure wired links Packet parsing, classification and distribution Queue management for scheduling, packet sequencing and congestion management Hardware buffer management for buffer allocation and de-allocation Cryptography acceleration (SEC 5.x)	
• Four lanes at up to 10 Gbit/s • Supports SGMII, 2.5 Gbit SGMII, QSGMII, XFI, 10G BASE-KR, PCI Express® and SATA	
• Up to 4 x Ethernet MACs	
• Integrated support for legacy WAN protocols TDM, HDLC, UART, ISDN and industrial protocols	
High-speed • Three PCI Express 2.0 controller peripheral interfaces	
One serial ATA (SATA 2.0) controller Two high-speed USB 2.0 controllers with integrated PHYs Enhanced secure digital host controller (SD/MMC/eMMC) Enhanced serial peripheral interface Two I²C controllers Four UARTS Integrated flash controller supporting NAND and NOR flash memory	
DMA • Dual four channel	
Support for hardware virtualization and partitioning enforcement • Extra privileged level for hypervisor support	
• Secure boot, secure debug, tamper detection, volatile key storage	
Single source clocking • For BOM cost reduction
